I study how virtual and augmented reality systems can be built so they actually work for people. My work pairs EEG, eye tracking and physiological sensing with XR deployments in hospitals, public space and safety-critical training — measuring what questionnaires cannot capture.

## APPOINTMENTS

|            |                                                                                                                                                                                     |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| since 2024 | <b>Co-Head, Computer Visualistics and Design</b> degree programme (with a co-lead), HSHL                                                                                            |
| since 2024 | <b>Founder and Director, HealthTech-HL</b> research group                                                                                                                           |
| since 2022 | <b>Lead, Human-Machine Interaction research area</b> , HSHL                                                                                                                         |
| since 2021 | <b>Professor of Computer Science (Immersive Media)</b> , Hamm-Lippstadt University of Applied Sciences · Director, Immersive Reality Lab                                            |
| since 2021 | Guest Researcher, Technische Universität Berlin                                                                                                                                     |
| 2018–2022  | Guest Researcher, DFKI Berlin — artificial intelligence in healthcare                                                                                                               |
| 2015–2021  | Senior Research Scientist, Technische Universität Berlin                                                                                                                            |
| 2012       | Guest Researcher, INRS Montreal — perception experiments using EEG                                                                                                                  |
| 2009–2014  | Research Scientist, Telekom Innovation Laboratories — subjective and physiological test methods for perceived media quality; six years of research and development outside academia |

## EDUCATION

|           |                                                                                                                                                                                                                                                                                               |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2014      | <b>Dr.-Ing.</b> (Doctor of Engineering), Technische Universität Berlin, Faculty IV — Electrical Engineering and Computer Science, <i>magna cum laude</i> .<br>Dissertation: <i>Neural Correlates of Quality Perception for Complex Speech Signals</i> , published as a monograph by Springer. |
| 2008      | <b>Diplom-Psychologe</b> (Psychology), Technische Universität Darmstadt, overall grade <i>sehr gut</i> — very good, the highest overall grade awarded in the German Diplom.                                                                                                                   |
| 2000–2003 | <b>Staatlich geprüfter Assistent für Datentechnik</b> (state-certified data technology assistant), Heinz-Nixdorf-Berufskolleg — state vocational examination in electrical engineering, information and telecommunication technology, specialising in data technology                         |

## Professional certification

|      |                                                                                                                                                                                 |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2016 | Professional Scrum Master I · Certified Scrum Product Owner — agile project methods, from the industry side of the six years spent in research and development outside academia |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## AWARDS & RECOGNITION

|      |                                                                                                                                                                                                                      |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2025 | <b>Best Paper Award</b> , MMVE Workshop @ ACM MMSys                                                                                                                                                                  |
| 2024 | <b>Key Innovator</b> , Innovation Radar of the European Commission — twice: <i>Validation Methodology for XR Digital Twin Applications</i> and <i>User-Centered Design Methodology for XR Digital Twin Solutions</i> |
| 2024 | Special Prize, Sustainability Award of Volksbank Beckum-Lippstadt (for a supervised Bachelor's thesis)                                                                                                               |
| 2023 | <b>Best Journal Paper Award</b> , IEEE Communications Society (MMTC)                                                                                                                                                 |
| 2023 | Diversity and Societal Impact Award, QoMEX                                                                                                                                                                           |
| 2021 | Conference Paper Honorable Mention, IEEE VR                                                                                                                                                                          |
| 2016 | Post-doctoral fellowship, Technische Universität Berlin                                                                                                                                                              |
| 2007 | Scholarship, Knowledge Enhancement for the Youth (KEY) programme of Daimler AG, Stuttgart                                                                                                                            |

## BIBLIOMETRICS

**2,995 citations** · h-index 29 · i10-index 83 (Google Scholar, 4 August 2026)

Of these, **2,055 citations** · h-index 23 · i10-index 62 **since 2021** — roughly two thirds of all citations fall in the last five years  
1,662 citations from 1,181 documents · 155 indexed publications · h-index 22 (Scopus)

**235 publications:** 2 monographs and edited volumes · 5 book chapters · 39 peer-reviewed journal articles and 6 further journal contributions · 105 peer-reviewed conference papers and 59 further conference contributions · 17 contributions to international standardization · 2 VDE position papers

## STANDARDIZATION & TRANSFER

Co-developer of **ITU-T Recommendation P.812**, *Principles of subjective test methods for interactive virtual reality (VR) applications* (2024)

**17 contributions** in total: ITU-T Study Group 12 (P.812, P.IntVR, P.PHYSIO, G.1035, P.GAME)

ISO/IEC JTC 1/SC 29/WG 2 (MPEG) — Metaverse use cases

DKE at DIN and VDE — digital qualification in healthcare

**Policy advice, United Kingdom:** co-author of a report on immersive technologies commissioned through UKRI under the DCMS Science and Analysis R&D Programme and written for government analysts and policy staff; contributed external expertise to the Metaverse Horizon Scanning workshop at Queen's University Belfast in May 2023 that fed into it

*Shaping the Metaverse: policy engagement with immersive technologies in the UK*, Queen's University Belfast, 2023

**2024 founding of XRWise gUG** under the BMWK innovation programme for business models and pioneering solutions — a non-profit spin-off carrying XR event tooling out of the research context

## INVITED TALKS & KEYNOTES

### Keynotes and invited talks

- |      |                                                                                                                                                                                                                                                                                                                                                                            |

| 2026 | <b>Invited talk</b> — <i>DIDYMOS-XR: Dynamische digitale Zwillinge in Extended Reality</i> — <i>realisiert am Smart Village Etteln</i> (DIDYMOS-XR: dynamic digital twins in extended reality, built at the smart village of Etteln). Westfälischer Zukunftsdialog, Westfalen e.V. mit der Hochschule Hamm-Lippstadt, Hamm, Germany.                                       |
| 2025 | <b>Invited talk</b> — <i>Affektives Potenzial immersiver XR: Konversationen mit Robotern und Navigation</i> (The affective potential of immersive XR: conversations with robots, and navigation). Smart Systems Conference, Dortmund, Germany.                                                                                                                             |
| 2025 | <b>Invited talk</b> — <i>MIA-PROM — Multimodal Assistant system for collecting Patient-Reported Outcome Measures</i> . Forschungssymposium „Metaverse meets Health“, Hagen, Germany.                                                                                                                                                                                       |
| 2023 | <b>Invited talk</b> — <i>Impulsvortrag Immersive Medien</i> (Immersive media — an impulse talk). Stadtlabor Soest, Soest, Germany.                                                                                                                                                                                                                                         |
| 2023 | <b>Invited talk</b> — <i>Nutzer*innenzentrierte Entwicklung von Chatbots: zur Optimierung von Systemen auf menschliche Bedürfnisse</i> (User-centred development of chatbots: fitting systems to human needs). Treffen der NExTcommunity Chatbot, NExT e.V. — Netzwerk: Experten für die digitale Transformation der Verwaltung, online.                                   |
| 2023 | <b>Invited talk</b> — <i>Introduction and selected research topics</i> . Metaverse Horizon Scanning workshop, Belfast, United Kingdom.                                                                                                                                                                                                                                     |
| 2023 | <b>Invited talk</b> — <i>Gebrauchstauglichkeit digitaler Assistenzsysteme durch Nutzer*innenzentrierung — Projektbeispiele mit verschiedenen Perspektiven</i> (Usability of digital assistance systems through user-centred design — project examples from several perspectives). 7. Ambient Medicine® Forum „CARE REGIO — Pflege im Aufbruch“, Kempten (Allgäu), Germany. |
| 2022 | <b>Keynote</b> — <i>Nutzung von Sprach- und Textparametern für die Personalisierung von digitalen Gesundheitsmaßnahmen</i> (Using speech and text parameters to personalise digital health interventions). Frühjahrstagung der Berliner Gesellschaft für Psychiatrie und Neurologie (BGPn), Berlin, Germany.                                                               |
| 2022 | <b>Workshop keynote</b> — <i>Umgang mit ethischen Fragen bei der Entwicklung von KI in EdTech-Anwendungen</i> (Handling ethical questions in the development of AI for educational technology). Workshop „Rahmenbedingungen für Künstliche Intelligenz in EdTech“, DELFI — Fachtagung Bildungstechnologien der Gesellschaft für Informatik, Karlsruhe, Germany.            |

### Visits and public visibility

|      |                                                                                                                                                                                                                                                                 |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2025 | <b>Presentation to a visiting delegation</b> — <i>Virtuelles Institut für VR/AR</i> (Virtual Institute for VR/AR). Besuch von Ina Brandes, Ministerin für Kultur und Wissenschaft des Landes Nordrhein-Westfalen, Lippstadt, Germany.                           |
| 2023 | <b>Project launch event</b> — <i>Virtuelles Institut Augmented Reality / Virtual Reality in der Produktentwicklung</i> (Virtual Institute for Augmented and Virtual Reality in product development). Auftaktveranstaltung „Digitalise_SWF“, Lippstadt, Germany. |

### THIRD-PARTY FUNDING

Approximately **€4.609 million** in continuous third-party funding since 2015, across **22 funded projects** from 10 funding lines, with awards running through 2029

20 of 22 projects (€4.509 million) applied for and led independently; 3 coordinated as consortium lead

Funders: European Union (Horizon Europe, EIT Digital, Joint Programming Initiative), State of North Rhine-Westphalia (EFRE), BMBF, BMW/BMWK, BMDV, Innovation Fund of the Federal Joint Committee (G-BA), GKV-Spitzenverband, DAAD, industry partners

| Period             | Project                            | Funder                                                       | Role                   | Volume          |

### SUPERVISION

**5 ongoing doctoral projects** in the Immersive Reality Lab, each embedded in a funded project — named topics and completed procedures on the teaching page

4 completed doctoral examinations supervised or reviewed at TU Berlin, including one binational cotutelle with the University of Technology Sydney

Where they went afterwards: three of the four are postdoctoral researchers at TU Berlin, one works in industry in Colombia

Papers from the lab are presented at their conferences by the doctoral researchers who wrote them — I lead the work, and prepare the presentation with them

**35 Master's and 70 Bachelor's theses** supervised since 2011

## TEACHING

Continuous teaching activity **since 2013**, at Technische Universität Berlin and Hamm-Lippstadt University of Applied Sciences, in German and English

Topics: Augmented Reality · Virtual Reality · Interactive Systems · Graphical User Interfaces · UX Research · Software Ergonomics · Visual Computing · Ubiquitous Computing · Game Development · Introduction to C and C++ · Usability Engineering · Physiological Computing

Module responsibility: *Human Perception* („Mensch und Wahrnehmung“) and *UX Research*

## SERVICE & LEADERSHIP

### Leadership

**Director, Immersive Reality Lab**, Hamm-Lippstadt University of Applied Sciences

Mission: developing and evaluating trustworthy XR systems for learning, work and public-space interaction

Team: **11 research staff and 7 student assistants**; annual budget of approximately €1 million

Infrastructure: XR headsets, eye-tracking setups, physiological sensing, behavioural observation and coding

### University self-governance

**Department Council (Fachbereichsrat), HSHL** — member since 2022

**Commission for Quality Improvement, HSHL** — member since 2022

**Appointment committee (Berufungskommission), HSHL** — member, one procedure

Degree programme co-lead (Computer Visualistics and Design) and research area lead are listed under Appointments

### Conference & workshop organisation

|            |                                                                                                                                                                                                                                                                              |
|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| since 2026 | Steering Committee, International Conference on Quality of Multimedia Experience (QoMEX)                                                                                                                                                                                     |
| 2026       | Technical Program Chair, MMVE 2026, Hong Kong (co-located with ACM MMSys '26)                                                                                                                                                                                                |
| 2026       | Workshop Co-Chair, Augmented Humans (AHs) International Conference 2026, Okinawa Institute of Science and Technology Graduate University, Japan                                                                                                                              |
| 2026       | Co-organiser, workshop <i>Multi-User Interactions in Immersive Smart Spaces</i> , 10th ACM International Symposium on Pervasive Displays (PerDis 2026), Munich                                                                                                               |
| 2026       | Co-organiser, <i>XR for Challenging Environments (XR4CE)</i> — second edition, 3 November 2026, satellite event of EuroXR 2026 and the Virtual Worlds Partnership Annual Forum, Valencia; with AIT Austrian Institute of Technology, University of Zagreb and Fraunhofer FIT |
| 2023       | Co-organiser, special session <i>Immersive Experiences</i> , QoMEX 2023 — with T. Kojić (TU Berlin) and S. Rossi (CWI Amsterdam)                                                                                                                                             |
| 2022       | General Chair, QoMEX 2022, Lippstadt                                                                                                                                                                                                                                         |
| 2021       | Co-organiser, special session <i>Quality and User Experience in Extended Reality</i> , QoMEX 2021, Montreal — held online — with T. Kojić (TU Berlin), G. Regal (AIT) and F. Garzotto (Politecnico di Milano)                                                                |
| 2019       | Local Chair, QoMEX 2019, Berlin — with I. Hube-Achter and I. Wechsung                                                                                                                                                                                                        |

### Editorial boards

|            |                                                                |
|------------|----------------------------------------------------------------|
| since 2025 | Editorial Board, <i>Virtual Worlds</i> (MDPI)                  |
| since 2021 | Editorial Board, <i>Quality and User Experience</i> (Springer) |

### Advisory boards

|           |                                            |
|-----------|--------------------------------------------|
| 2025–2027 | Advisory Board, TD-CHAT (Charité Berlin)   |
| 2023–2025 | Advisory Board, STOP-CSAM (Charité Berlin) |

### Research proposal review

**Germany:** Deutsche Forschungsgemeinschaft (DFG) · BMBF project management agencies · VolkswagenStiftung · DAAD, in the Transnational Education line — degree programmes offered by German universities abroad

**European Commission:** Expert Evaluator, Horizon Europe

**Other national agencies:** FFG (Austria) · NWO (Netherlands)

Both as an individual reviewer and as a member of evaluation panels

**Reviewing & programme committees**

**Conferences:** ACM CHI · IEEE ISMAR · ACM VRST · QoMEX · INTERSPEECH · ICASSP

**Journals:** IEEE Transactions on Visualization and Computer Graphics · IEEE Transactions on Multimedia · JMIR · Experimental Brain Research · Journal of Building Engineering

**Memberships**

ACM · IEEE · VDE, including its Information Technology Society (ITG)

Joint publications, research proposals and project partnerships with partners in **19 countries**: Australia, Austria, Belgium, Brazil, Canada, Croatia, Denmark, Finland, Greece, Italy, Lebanon, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, United Kingdom, United States

Research stay: INRS Montreal, CA (2012) — Perception experiments using EEG

**Named partner institutions**

Politecnico di Milano IT — Social acceptability and interactivity in AR/VR; joint publications and supervision

University of Technology Sydney AU — Affect recognition in VR, virtual health assistants, digital twins; binational cotutelle doctorate (A. Pinilla, 2022)

American University of Beirut LB — Horizon Europe project on digital twins for extended reality

NTNU Trondheim NO — Quality of Experience, immersive media experience, QUALINET

University of Zagreb HR — ITU-T standardization of interactive VR test methods

University of Toronto CA — Randomised controlled trial on aphasia training (JMIR)

University of Bremen / St. Gallen DE/CH — Pseudo-haptics and vibrotactile feedback in VR (ACM CHI 2024)

Queen's University Belfast UK — Policy work on immersive technologies

## SELECTED PUBLICATIONS

Chosen by a fixed rule rather than by preference: every publication carrying an award, then the most recent journal articles. The complete list of 235 — with filters by year, type and topic — is at [voigt-antons.de/publications/](https://voigt-antons.de/publications/).
